Ideation Phase
Empathize & Discover

Date	8 March 2026
Team ID	Team169
Project Name	Insurance Fraud Detection using Machine Learning
Maximum Marks	4 Marks

Empathy Map Canvas:

User: Insurance Company / Claims Investigator

Says: “We need a reliable way to detect fraudulent claims quickly and accurately.”

Thinks: “Manual verification takes too much time and some fraud cases still go undetected.”

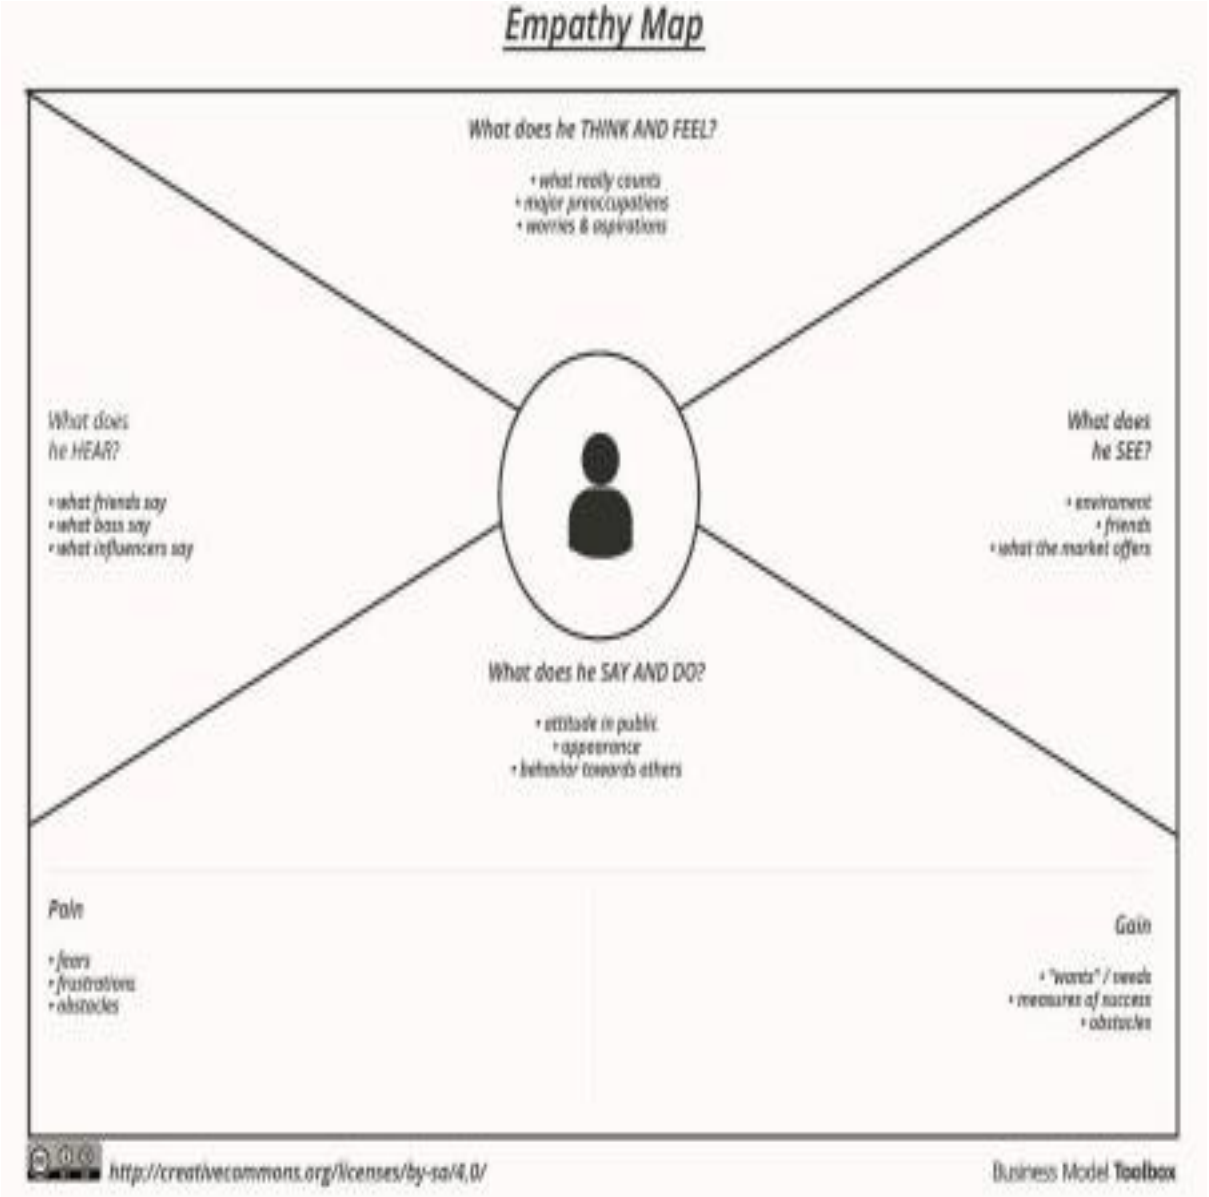
Does: Reviews insurance claims, verifies documents, checks claim history, and investigates suspicious cases.

Feels: Concerned about financial losses due to fraud but motivated to improve claim verification efficiency.

Pain Points: Large volume of claims, difficulty identifying hidden fraud patterns, and time-consuming manual investigations.

Gains: Faster fraud detection, reduced financial losses, improved claim processing, and better decision-making using data analytics.

Example:



Empathy Map
What does he THINK AND FEEL?
• what really counts
• major preoccupations
• worries & aspirations
What does he HEAR?
• what friends say
• what boss say
• what influencers say
What does he SEE?
• environment
• friends
• what the market offers
What does he SAY AND DO?
• attitude in public
• appearance
• behavior towards others
Pain
• fears
• frustrations
• obstacles
Gain
• "wants" / needs
• measures of success
• obstacles
